2. Getting Started

Announcement: our company has always been dedicating to improving product quality and when the software edition is updated and if the finished product is inconsistent to functions described in the user manual, the finished product shall prevail.

2.1 Battery Recharge

The tablet PC is equipped with one built-in battery and it would suggest recharging when the battery is low.

Power Adaptor

Connect the plug of the power adaptor to the power socket and the other to the equipment jacket to recharge.

Recharging

1. Plug the power adaptor and the recharging indicator will be red which means it's recharging. When the battery is full, the indicator will be green. Unplug the power adaptor, the indicator will stay green.

2. During recharging, you could still use the equipment.

Notice:

The recharging time will be longer if the equipment is in operation.

2.2 Memory Card

Insert the Memory Card:

Insert the memory card into the slot and press until a crack is heard. The upper left of the screen will indicate: Preparing TF card.

Browsing the Memory Card:

Run the Document Browser application to show all files under the root directory and select Memory Card 1 to browse the contents in the card.

Unplug the Memory Card:

Close all files in the card, touch the menu icon and select setting \rightarrow TF Card and Equipment Memory \rightarrow Memory Card 1 \rightarrow Uninstall TF Card. The system will show "TF Card is safely removed". Press the card and the card will pop out. Take it out and the upper left screen will show "The TF card is removed".

Notice:

1. The card insertion has to be proper or the card will be damaged;

2. Don't forcibly unplug the memory card without the message "The TF card is removed", or it might damage the card;

3. If the card is write-protected, it wouldn't be formatted or written before canceling write-protection.

4. Mainstream memory cards are advised to avoid compatibility.

2.3 Hot Plug of Memory Card and External Flash Disk

Don't hot plug when you are using or browsing the files in the memory card or in the external flash disk. For example, you're browsing My Video, My Video or My Photo Album or using files in the memory card or in the external flash disk, directly unplugging the memory card or external flash disk may damage the card and the flash disk and the equipment may terminal the application for self protection. For hot plug of the memory card, please refer to 2.2 Memory Card. Close all files in the flash card before unplugging the external flash disk.

2.4 Storage Space

There are 3 storage spaces: equipment internal memory, flash disk and memory card. The equipment internal memory will not be shown; the fold names of memory are Memory Card 1 and Memory Card 2; the fold names of the external flash disk are Flash Disk 1 and Flash Disk 2. The system storage area is only for system file storage; the entire equipment internal space is 2GB and the flash disk and memory card are subject to the specific capacity supporting 32GB maximum.

For detailed information, please refer to 9.6 TF Card and Equipment Memory 2.5 Power on/off

1. Power on:

When the battery is enough, press the power icon for 2 seconds. The equipment will be vibrating for once during power on and it enters screen lock interface as follows after the power on is finished:

Slide the unlock icon upward to enter the main interface; slide the electronic photo frame icon downward to enter photo play interface.

2. Power off:

Slide the power off icon upward to shut down the equipment and it will be vibrating for once; slide the cancel icon downward to exit power off interface.

3. Dormancy:

Press the power icon (1 second) and the system will enter the dormant status and the LCD screen will fade. Press the power icon to wake the system during dormancy and it enters screen lock interface. If the battery is low during dormancy, the equipment will power on the system and power off the system to save the power.

2.6 Vibration

Enable Vibration: touch setting icon Settings on the shortcut bar, choose voice and display setting and choose check box on the back of touch feedback to enable vibration.

Disable Vibration: when the vibration is on, touch setting icon

on the shortcut bar, choose voice and display setting and choose check box on the back of touch feedback to disable vibration.

2.7 Screen Rotation

The screen will automatically rotate in responding to equipment direction. If you hold it vertically, the screen will be vertical and if you hold it horizontally, the screen will be horizontal. The screen rotation will be done in 2 seconds and be refreshed back to normal after rotation.

2.8 Network Cable and Flash Disk

External Cable:

Insert the cable into the Ethernet port and after the cable is connected, the equipment will automatically be distributed an IP address or you can also acquire an IP address by manual setting.

External Flash Disk:

Insert the flash disk into USB port. After flash disk connection, you can copy files between the flash disk, the equipment and the memory card. For copy method, please refer to 7.3 Document Browser

2.9 Network Connection

Cable Network:

Insert the cable into the Ethernet port of the tablet PC and ETH icon will be shown on the top status bar on the screen. The equipment will connect the network by automatically acquiring an IP address. You also can acquire an IP address by manual setting. After the IP address is set, you

can surf the internet. Refer 8.2 Shortcut Configuration.

Wireless Network:

- 1. Turn the Wi-Fi switch to the left and it's enabled;
- 2. Touch the setting icon on the shortcut bar;
- 3. Touch the Wireless Network on the setting menu;
- 4. Open Wi-Fi on the check box;
- 5. Touch Wi-Fi Setting to set Wi-Fi network;

6. All equipment that are able to search AP will be listed. Touch the AP name that you want to connect.

7. If the AP was connected successfully once, AP information is stored. Choose "Connect" on the popup menu and choosing "Forget" will erase AP information.

8. If the AP is not encrypted, choose "Connect" to connect on the popup menu;

9. If the AP is not encrypted, input the password on the popup menu and choose "Connect" to connect;

10. After the network is connected, a wireless connection icon will be shown on the top status bar.

3. Input Operation

3.1 Keyboard

When you need to input text or number, the touch keyboard of the screen will automatically be shown.

Notice: the equipment supports external USB keyboard but some buttons will not work if it's connected to an external USB keyboard.

3.2 Touch Screen

The touch screen responds to finger touch and you can:

Notice: don't place any object on the touch screen for it may damage or crush the screen.

Single Click: single click one icon to choose the icon or option you want.

Long Press: long press one icon to choose the icon and you can drag it to the bottom shortcut bar. Drag: drag on the screen and you can move between magic cube sides or drag the application icons into the shortcut bar.

You can also use the touch pen instead of your finger.

3.3 Mouse

The equipment supports external USB mouse. Connect an USB mouse and you can single click, choose, drag, slide and right click.

4. Desktop

4.1 Status Bar

The top of the screen is the status bar and there is one button on the left and five buttons on the right which are Desktop Button, Screen Capturing Button, Volume Button, Menu Button and Return Button. On the status bar, there are system information including 3G signal status, Wi-Fi signal status, Ethernet status, battery status and time.

4.2 Main Interface

The main interface application page of the tablet PC has two modes: desktop gadget mode and application icon mode. You can switch modes by the central button on the shortcut bar. The desktop gadget mode is shown as follows:

Click the button on the shortcut bar to enter application icon mode. The application icon mode is shown as follows:

4.3 Shortcut

On the desktop gadget mode interface, press the menu button or click the menu icon when on the top status bar and a shortcut menu will pop up at the bottom of the screen. The shortcut menu includes: Add, Wallpaper, Search, Notice, Desktop Setting, System Configuration. See the picture below:

4.4 Add Gadgets

Shortcut

If you want to add the shortcut into the main screen, press Menu \rightarrow Add \rightarrow Shortcut on the desktop gadget mode interface. Choose the shortcut and add it into the main screen. Click the shortcut icon on the main screen and it will execute the corresponding operation.

6. Application Software Management

6.1 Installation and Uninstallation

Installation

If you want to install the software from a third party, please go to APK installer, Select "Installer" and then select the file with the extension name .apk in the memory card. Click "Install" to install the software,

After installation, you can run the software right away or run the software on the subcategory interface.

Uninstallation

If you want to uninstall the software from a third party, please go to "Manager" of APK installer, Select the software that you want to uninstall, the options you have are: run, extract, uninstall and search. Click "uninstall" to uninstall the software.

7. Typical Application Introduction

7.1 Instant Message

You can download instant message software, such as Fring, QQ and MSN.

7.2 E-mail

Click the E-mail icon **Gmail** to go to E-mail interface and you can:

- 1. Set up your E-mail account;
- 2. Create a new E-mail;
- 3. Receive and send E-mail;
- 4. Download or open the attachment;

Notice: press the menu button to open the shortcut menu.

7.3 Document Browser

Click the document browser icon ^{PhotoFrame} to go to document browser interface:

Click "Yes" to delete the file.

Software Installation:

If you want to install the software in the document browser, all you have to do is click the installation file with the extension name .apk and a prompt box will pop up. Select "Install" to install the software in the equipment.

7.4 Electronic Photo Frame

Click the electronic photo frame icon PhotoFrame to browse your photos to play them in slide mode in full screen.

Click the MENU button to pop up the shortcut menu of the electronic photo frame. You can:

- 1. Select random play
- 2. Share playing pictures
- 3. Set time interval of picture
- 4. Set the folder that you want to play
- 5. Related setting options

The interface is shown as follows:

You have many animation effects (such as slide, zoom and rotate) and various special photo effects (such as negative film, old picture, emboss).

If you want to switch special photo effects, refer to below operation:

Change special picture effect to old picture mode

1. Press the MENU button on the top of the equipment to pop up the shortcut menu;

- 2. Click Setting button to pop up setting options;
- 3. Click special photo effects button;

4. Select Older Picture button and when the point on the right of the older picture is green, the transformation is finished.

You can also adjust the brightness of day and night mode.

7.5 Multimedia Library

Click Multimedia Library icon Gallery

Not insert Disconnected			

First, you have to buy a 3G wireless card from China Telecom, China Mobile or China Unicom. The equipment at present supports: Wangxun E1916.

Since our company is continuously committed to improving product quality and the software edition is always updating which will support more models in the future, please refer to the

finished products.

You have to buy above mentioned model to get access to 3G network. Insert your SIM card into the 3G card and then insert the 3G card into the USB port. The signal light of the 3G card will be light which means you're ready for 3G network surfing.

G

Click 3G network icon 3G Settings to enter:

Select the checkbox on the back of 3G network and you'll see which means 3G connection is completed.

8.3 Battery Hints

The equipment has a wide screen and needs a lot of power. If you want to extend the endurance of the battery, you can reduce the frequencies below:

1. Watch movies, listen to the music or take photos;

2. Display brightness: press menu button \rightarrow setting \rightarrow sound and display (display setting) \rightarrow brightness (reduce the brightness);

3. Network search: press menu button \rightarrow setting \rightarrow wireless and network \rightarrow connect to wireless network \rightarrow Wi-Fi setting \rightarrow network notice;

4. Wi-Fi application: set the Wi-Fi switch button to close status (close Wi-Fi).

If you want to check the edition number, please press menu button \rightarrow system configuration \rightarrow about equipment \rightarrow edition number.

10. HDMI

You can switch the video to play it on the HDMI display equipment (such as TV with a HDMI interface) by HDMI. The maximum output resolution is 720p and its method is shown as follows:

1. Open the equipment;

2. Connect the equipment and HDMI display equipment. Open the display equipment and a HDMI connection message will pop up on the status bar.

3. Play video on the equipment;

4. Press MENU button and the equipment screen will be black. The video will be switched on the HDMI display equipment to continue. Wait for 5 seconds or so;

5. You can switch by 4 methods:

1) When the video play is over, the video will be switched automatically back on the equipment.

2) You can also press MENU button in the process of video, the video will be switched back on the equipment.

3) You can also unplug HDMI directly in the process of video, the video will be switched back on the equipment.

4) You can also press button to exit video play, the video will be switched back on the equipment.

11. Tablet PC Lock

Screen/Equipment Lock:

1. When the screen is idle (no button pressing), the equipment will go into dormancy status and become black by the system time;

2. Short press the power button, the equipment will go into dormancy status and become black.

Screen/Equipment unlock:

When the system go into dormancy status, short press the power button to go to screen lock interface and you can slide the unlock icon upward to unlock the screen.

12. Trouble Shooting

12.1 Close Application

All applications enabled take up system memory and will slow down system response. So you need to close idle applications to release memory and the system speed will be back to normal.

If you want to close the application, click the icon $\xrightarrow{\text{Settings}}$ on the shortcut bar to enter the system configuration interface. Select the application \rightarrow running services and the interface is shown as follows:

Home 1.1	🔋 🔳 2:43 PM Prt Sc Vol- Vol+ Menu Back
Running services	
Android keyboard Process: com.android.Inputmethod.latin	3.5MB
Android keyboard Input method: touch to manage	21:10
